MAGIX Music Maker 17 Silver

Even people who have never picked up an instrument like the idea of creating music. While there is little to stop anyone learning to play guitar, piano or any other instrument, many people's musical dreams are simply ignored. Thanks to the ease of use and surprising versatility of MAGIX Music Maker Silver, anyone with even the vaguest musical inclining can start to create something that is genuinely impressive.

Create beautiful music in this easy to use powerful audio studio worth \$19.95

This is the free version of MAGIX flagship music creation program, so it should come as no surprise that there are a few bits and pieces missing. Ultimately this boils down to fewer samples and loops to work with, but whether you use the program as it is, or decide to upgrade to a more advanced version, the Silver edition works as a great introduction to the software and gives you a great idea of what can be achieved.

While the Silver version of MAGIX Music Maker encourages user to upgrade to the Premium edition, it is still a very worthy program in its own right. You have four tracks to work with - which as any home musician will tell you, can be used to great effect - and there is a selection of samples that you can use in your musical creations by simply dragging them into place on the audio timeline.

Samples, or 'soundpools' as they are known, are available in three
